PROFESSIONAL SUMMARY

A highly motivated Machine Learning Engineer with a strong foundation in Python, TensorFlow, and deep learning techniques. Proven ability to develop and deploy accurate and efficient models. Expertise in data exploration, feature engineering, and model optimization. A quick learner and strong team player, eager to contribute to a collaborative team and leverage my skills to solve complex problems in the field of machine learning.

EDUCATION QUALIFICATIONS

Degree / Qualification (Board / University to be mentioned)	School / College (Include City & State)	Year of Pass Out	Score (CGPA/%ge)
BE in information technology	NMIET,Pune Maharashtra	2024	9.36
HSC	GRPS ,Pune,Maharashtra	2020	81.85%
SSC	NES, Pune,Maharashtra	2018	91.60%

WORK EXPERIENCE

Quantiphi| Mumbai, Maharashtra

Feb 2024 – Present

As a Machine Learning Engineer, I'm focused on data discovery within a GCP project. My responsibilities include identifying key features, conducting exploratory data analysis (EDA), and building a comprehensive master table.

- Python,Machine Learning,Deep Learning,Tensorflow,LLM,Transformers,GAN,Object classification

PHN Technology pvt. Ltd | Pune,Maharashtra

April 2023 – June 2023

Perform task on Python, Data Cleaning, feature Engineering, Feature Extraction and Data Visualization

- Python , Python Libraries, Machine Learning , EDA

ADDITIONAL PROJECTS

MultiLabel Genre Classification

Developed a multi-label genre classification model using TensorFlow to automatically assign genres to movies based on their summaries. This involved leveraging pre-built embeddings, training a Transformer-based architecture, achieving a 70% precision score, deploying the model as an API using TF Serving, and building a client for continuous data ingestion.

EXTRA CURRICULAR ACTIVITIES

- Participates in Technostav Event during my college days
